Projects

Portfolio Website [\[View\]](#)

- I have made this project using HTML CSS and JavaScript.
- This website is completely responsive and made from Bootstrap.
- In this website I completely elaborate my experience, projects, and skills.

Go-pro-Code.

- I have made this project using HTML, CSS, and JS.
- This project is made as a Live code editor for frontend.
- It is a web page that works like code pen and other online editors.

Hotel Management System

- I have made this project using ReactJs.
- This website is completely responsive.
- All Hotel required fields forms and many more to explore.

LinkedIn Clone

- This is a project developed using React JS.
- This project looks like LinkedIn and all its components are ready to use.
- Signing in with google is enabled through firebase as a backend.

Real time chat Application

- I have made this project using ReactJs and socket.io.
- This is a real-time web page opened to multiple clients.
- All Hotel required fields forms and many more to explore.

Sorting Visualizer

- A mobile application that visualizes various sorting algorithms
- such as Bubble sort, selection sort, quick sort etc.
- The sorting process is visualized as the rearrangement of vertical lines of different lengths from shortest to tallest.
